PROFILE

Senior UX designer, six years in, mostly on **large enterprise products in telecom, banking and healthcare**: T-Mobile, Standard Bank, Anthem, Elevance Health. I work end to end, from the first research call through to the design system and the handoff. Over the past two years I've folded AI into how I actually work: **Claude Code with custom plugins and MCP servers** for the parts of the job that eat a week, **local models on my own hardware** when the data isn't allowed to leave it, and generative tooling to get something testable in front of people sooner. **German B1** and working towards B2, and **IELTS 8.0**.

EXPERIENCE

2022 TO NOW

UST Global, Senior User Experience Designer

2022 - Present · Bengaluru, IN

UST puts designers onto client accounts for the long haul. I've had four, and I've been the sole or lead designer on each of them.

Elevance Health (USA) — Nov 2025 - Jul 2026

HEALTHCARE · PLATFORM MODERNISATION

- Ran the **UX research** behind a platform modernisation programme, working with the teams who use the internal tooling every day rather than designing at them from a distance.
- Turned the findings into a design direction the programme could build against, not a deck that gets read once and filed.
- Reworked the core workflows and the patterns underneath them, so the platform held together as more teams moved onto the modernised version.

T-Mobile (USA) — Jan 2023 - Oct 2025

TELECOM · INTERNAL CLOUD PLATFORM · 2.8 YRS

- Led UX on **MAIA Self-Service**, T-Mobile's internal platform for managing cloud applications. I owned the first-time user experience, from the onboarding research through to a prototype we'd actually tested.
- Designed the **T-Cloud dashboard**, which pulled cloud service management out of half a dozen scattered places into one view engineers could work from.
- Ran usability sessions on onboarding, then worked the findings through with platform engineering. What came out was a list of things we could ship, not a wishlist.

Standard Bank (South Africa, Lesotho, Uganda, Ghana) — Jan 2023 - Apr 2024

RETAIL BANKING · 4 MARKETS

- Designed and shipped the **Mobile Wallet** across four African markets. One product, four sets of rules, so most of the work was deciding what had to flex per market and what had to stay identical.
- Turned the payment, confirmation, error and warning states into a pattern set the market teams could reuse, so nobody had to redesign a flow just to add a screen.
- These screens are live in production, used by retail banking customers in all four countries.

Anthem BlueCross BlueShield (USA) — Mar 2022 - Dec 2022

HEALTHCARE · CARE DISCOVERY

- Redesigned the **Find Care** booking flow and got it from **eight steps down to four**, cutting out the dead ends that were quietly pushing members to the call centre.
- Rebuilt provider search and filtering so results were something a member could act on.

AI IN PRACTICE

HOW I USE IT

- **Agentic workflows.** Claude Code with custom plugins and MCP servers, pointed at the work that normally eats a designer's week: auditing design systems, writing specs, keeping component docs honest against the repo.
- **Local models.** I self-host models on my own hardware for research synthesis, transcript work and copy passes. Useful where the data isn't allowed to leave the building.
- **Generative visuals.** MidJourney, SDXL and Fooocus for concept work, moodboards and one-off assets.
- **Fast prototypes.** Lovable and Google Stitch to get something clickable in front of a user the same day, then whatever survives contact goes back into Figma properly.
- **Knowing when not to.** AI is good at exploration and documentation. Research calls, accessibility decisions and the last ten percent of craft are still mine.

TOOLCHAIN

DESIGN	Figma · Sketch · Adobe XD · Axure RP · Principle · Affinity Designer · Adobe Creative Suite
PRACTICE	User research · Information architecture · Interaction design · Prototyping · Usability testing · Design systems · Service design · Accessibility (WCAG)
AI	Claude Code (plugins, MCP) · Local LLM hosting · MidJourney · SDXL · Fooocus · Lovable · Google Stitch
BUILD	HTML / CSS · Responsive systems · Design to dev handoff
MOTION / AV	Final Cut Pro · Logic Pro X

LANGUAGES

CERTIFIED 2026

English C1

IELTS Academic, May 2026. Overall 8.0
L 9.0 · R 8.5 · W 7.0 · S 8.0

German B1

telc Deutsch B1, March 2026, Bengaluru
Currently preparing for B2

EDUCATION

Istituto Europeo di Design, Florence & Barcelona · MA, Brand Design & Management (Food, Wine & Tourism) — 2021

Birmingham City University · BSc (Hons) Interactive Media: Game Design & Development — 2018

Indus International School, Bengaluru · International Baccalaureate — 2014

Master's capstone · Service design overhaul for the Yurbban Trafalgar Hotel, Barcelona — 2021

CERTIFICATIONS

2020

International Business Management Institute · SAP Certified Associate: Design Thinking · Basics of Project Management · Economics & International Business · Marketing & Communications — 2020

DesignBoat UI/UX School · UI/UX Design — 2020

EARLIER

2016 TO 2021

Vewox · Digital Marketer & Graphic Designer — Oct - Dec 2021

Analytics India Magazine · Community Evangelist — Feb 2016 - Apr 2019

HackerEarth, Bengaluru · Social Media Marketing Intern — Aug 2018 - Feb 2019

Myndroot, Kolkata · Motion & Graphic Design — Feb - Apr 2018

BEYOND WORK

- **Self-hosted infrastructure.** There's a NAS in my flat running Docker, with Plex, Jellyfin and local LLM inference on top. It's why conversations with engineers start at the second question, not the first.
- **Also.** Computer hardware, security and privacy, music production and drumming, competitive gaming, and more geopolitics reading than is strictly good for me.
